

"When I first came to Rehabilitation Specialists I had a great deal of pain in my right hip and lower back. Since receiving treatment my hip has greatly improved and my back is somewhat better. I am very happy to be relieved of the hip pain that was keeping me from doing much of anything. I'm grateful to all personnel that has helped me." -- M.R.

"When I first started coming to Rehabilitation Specialists, I had severe pain in my left leg. I could not lift things, and I walked with a severe limp. I also was taking 3-4 prescribed pain pills a day. Now, after 4 sessions, the pain is 90% gone, I have recovered full movement (can bend and lift), and I only take pain medication once daily or not at all. Bruce Diven helped me during my four sessions, and I would 100% recommend RS to my family and friends." – M.S.

"I came to Dr Barbour's office a day after a bad fall, bending my knee in a bad position. It was painful and hard to walk on. I also had been suffering from tinnitus and vertigo attacks. After seeing Dr Barbour and his team at the Healing Circle, the ringing in my ears is very much reduced along with the feeling of spinning. My knee pain is almost gone and I feel comfortable walking. He says I won't feel a thing in 3 days. Thanks, Dr Barbour and Team!" – F.Z.

"Barb manipulated the right ankle in such a way as to allow pain free movement which I have not experienced in 21 years. Both Noel and Barb were extremely good in their rehabilitative therapy. I would highly recommend RS to anyone in need of therapy to regain pain free movement and strength." – D.P.

"I came here to physical therapy for my knee. Doing things like walking on my treadmill was painful and tiresome for my knee. The staff was very nice and helpful. When I had questions they took the time to listen and answer them. They encouraged me to do my exercises, and between them and the physical therapy I was walking on my treadmill pain free. Alena the therapy assistant was very nice and patient as well as informative." – J.T.

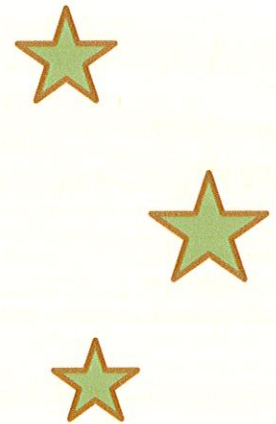

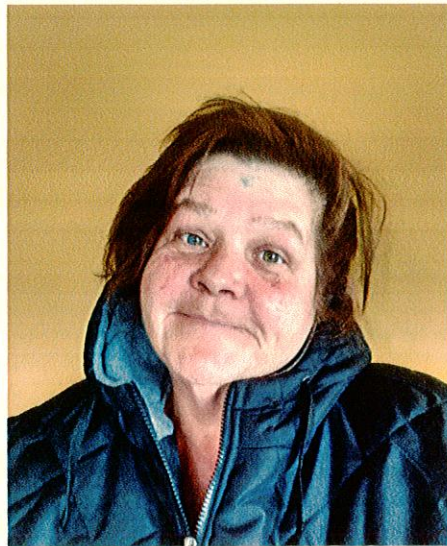

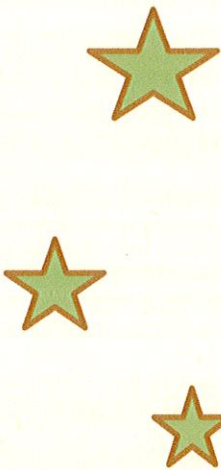

"I came in Nov. 2009 to Dr. Barbour with ability to walk 200 walking steps per day, with severe leg cramps. I now can walk over 6000 steps per day. He cured my slow and steady with no medication. He is a miracle man!" – S.K.

Sara McManaway

I was 7 months pregnant. I was experiencing some pretty awful sciatica. I was unable to stand for long periods of time, or walk. I was working full time and needed to be on my feet. I wasn't getting much sleep because every position I laid in was uncomfortable. The pain was so unbearable at times that it radiated all the way up to my head and down to my toes. The OB at one time even sent me for a Doppler on my legs fearing clots because I was in so much pain. I came to see Dr. Barbour and Tim Kellie during a healing circle praying for some sort of relief. They both were very mindful of my pregnancy and were caring and careful. They took their time and made sure to explore every possibility of what could have been causing my pain. After my first initial visit, I left feeling optimistic. I was able to walk more comfortably, knowing that after a few more sessions I would be feeling like myself again. I saw Dr. Barbour and Tim many times after that through my pregnancy. After my final session I was pain free walking well and sleeping well and ready to welcome my daughter into the world. Thank you Dr. Barbour and Tim Kellie!

I have been seeing Dr. Barbour since the start of 2016 and have seen various improvements of my aches and pains, from hip-related (which was the first reason) to current right shoulder. After treatments from Dr. Barbour, my hip-related issues went completely away, with currently no pain at all. My right shoulder has seen the pain threshold lower, although movement is still an issue. On occasions, I have had back rib pain and after one treatment, it went completely away. I have recommended Dr. Barbour to friends and business associates and forwarded his information to them. Dr. Barbour is a credit and an asset to his professionalism.

Patricia Johnson

Not only am I an employee of Rehab Specialists, I am a patient too! Dr Barbour helped me get through a knee injury last year and with the help of the P.T. Department (Noel, Barb and Hannah). We got the torn meniscus in my knee feeling better (without surgery!). Through their expertise and guidance I was able to improve my ROM and strength in the knee and reduce the pain.

I did not have to use a cane for very long thanks to them!

Dr Barbour helps to decrease my aches and pains due to arthritis and stress with weekly OMT treatments. We are all very fortunate to have him as both a boss and a doctor.

Dr Abou-Chakra suggested injections for my painful knee, and they really did help! Brandi was so helpful with assisting during the injection, easing my mind and holding my hand through the process. There was very little pain with the injection because Dr Abou-Chakra is extremely skilled and experienced.

He is a very kind and considerate physician and I am grateful for his help. I believe the injections have helped relieve the pain of OA and I am able to postpone knee surgery.

Of course I would highly recommend anyone to come to Rehab Specialists, there is a perfect course of treatment for all types of problems.

Alice M. Brown

November 24, 2015

Dear Dr. Barbour:

This letter of thanks is long overdue, but I was waiting for your help to plateau and not continue to increase my physical abilities greatly increasing my quality of life, all while decreasing my pain from headaches, herniated disks, and multiple joint injuries. I am still getting better even though I am 17 years out from the accident and a senior by chronologic age.

My life changed forever December 4, 1998 when I was hit head on by a car passing a truck that just pulled out in front of him. The driver had a choice of running into a 6 foot ditch (on either side of the road), hitting the back of the truck, or take a chance there was no one in the other lane. He chose the latter, which I understand but deeply regret, as does my body.

My Car

My Foot was reconstructed.

As you can see the Jaws of Life were needed to extricate me. My knees were crushed by firewall; hands broke the steering wheel as I saw it coming so I braced myself on it while standing on the brakes. Do to the angle of women's leg and foot; women tend to crush their ankles, as I did, vs. men who break the bones of the lower leg as did he which heals better than the foot. Foot reconstruction was required as you can see in the photo.

Thanks to my surgeons, physical therapists and now, Dr. Barbour I am able to walk, though still use wheelchair or scooter for long stretches or on bad days, have many less headaches, less hand and arm pain, and have a greatly improved my quality of life. I am now almost able to keep up with my 6 year old grandson and amazing hubby.

Thank you for my new lease on life, improved mobility and hope to continue to improve.

Alice

When I came to you folks before Thanksgiving I could hardly put pressure on my right leg. I was hobbling about "like an old lady", afraid to take a step, afraid to sit, and afraid to walk. Well, I was "too busy" to do therapy until late January. I chose water therapy because of its buoyancy and support as I exercised. At first I could barely side-step and I couldn't march because I couldn't raise my leg. My right hip radiated pain. After 4 weeks of therapy Barbara has me side-stepping and gently marching. I'm still weak and can feel the pain subtly but I am rejoicing that I have made such great strides towards recovery. Even my sympathetic neck + shoulder stiffness have subsided. Thank you all for your combined help - smiling competent staff and Dr Steppi's wise council and therapy.

When I came into Rehabilitation Specialists after my Total Knee Replacement, I walked with a cane, and couldn't bend my knee very far, Now I have full Range of motion in my knee and can do anything I want to do.

I had a friend who had the same surgery done 1 month before me. And she is not able to bend her knee. She went somewhere different. Thanks to Bruce Liven for all his help during my recovery.

I came to Sally & Noel with pretty severe knee pain. I had a tear they told me. I informed them that I was going to Israel in 2 months so I had to be healed by them. They pulled it off. I ~~to~~ saw them 3 times a week for six weeks. Besides enjoying my visits, they healed my knee! I'm leaving tuesday for Israel with a pain free working knee - thank you Noel & Sally!

I had been having pain for two days in my right
glut muscle in my hip the pain was about a 6-7 when
I came into P.T. I even had to ask not to
get in the pool due to pain. After manual therapy
and Heat and TENS unit I am so happy
to say I will be leaving with much less
pain down to a 2-3. Thank you!

I came to see Dr. Barbour about my right ankle which I had sprained two weeks earlier. After just one treatment I had less pain and more mobility. I will continue to see Dr. Barbor because I know how big of a difference he can make with pain and mobility. This isn't the first time he has helped me recover from an injury much faster than I would of recovered if I had not seen him and it always amazes me how good he is at his profession.

Thank you Dr. Barbour

~~At~~ Before I came here I was having a lot of pain walking, even putting weight on my leg was a problem. After coming to therapy only once I could see such a significant difference. I was able to put a little weight on my leg and try and walk more normally. and left feeling great without pain just a little discomfort. I'm so happy with my results this far, and being its only the beginning.

SUCCESS STORY

Please write, in your own words, what your success here has been:

My first visit made to Rehabilitation Specialists of Monroe was in June, 2011. I was referred to Doctor Barbour by my family doctor to have him review my x-rays of my left knee and back. I had arthroscopic surgery on my knee a few years ago, and arthritis had set in and I was not able to extend it fully, and also having severe pain and swelling. Not being able to walk properly, the pain was now affecting both of my hips and back. After five visits to Doctor Barbour, he was able to correct the inconsistency of my walking by adjusting and working so diligently on my feet, ankles and knees, which has given me a remarkable healing cycle. Doctor Barbour has put me on Glucosamine Sulfate tablets along with MSM. After several months, I have regained nearly eighty percent of being pain free and have increased my mobility as well. I owe a debt of gratitude to Doctor Barbour for his experience and knowledge of which I thought otherwise of having a total knee replacement.
