## Success Story

Please write, in your own words, what your success here has been:

My son was diagnosed at 2 months with infantile scoliosis. We started to bring him in for therapy at the age of 3 months. At first we ~~we~~ came in for visits once every other week. Then we went to once a week for about two months. By the time my son was 9 mo. old Dr. Barbour said that my son's back was straight and that we could discontinue therapy. We were elated because originally U of M said it could take up to two years for his back to straighten. Many, many thanks to Tim who was so wonderful when working with my son weekly! Also to Dr. Barbour who encouraged Lisa Markburg 12-13-99  
 us to get rid of the brace. what a difference that made!

**SUCCESS STORY**

Please write, in your own words, what your success here has been:

At first I thought this was too good to be true, but it really does work! My back has been causing my whole body to be "off". But since I have been going to therapy my back has straightened 13 degrees. Thank You Physical Therapy! ♥

SUCCESS STORY

Please write, in your own words, what your success here has been:

Resa went to U. of M to  
get her scoliosis measured and it  
went from 28 to 8 !!  
U.
